Owner: Tom Karl

In 2000, Missouri enacted 590.650, which requires all law enforcement agencies to report traffic stop information to the Missouri Attorney General's office. Compiling this information is time consuming and labor intensive. And failure to meet the reporting deadline or providing inaccurate data could result in a loss of state funding.

Law Enforcement Software Solutions, LLC met this challenge by creating Traffic Stop Reporting Desktop (TSR-Desktop). TSR is designed with Missouri law enforcement agencies in mind. TSR is designed to reduce labor costs, be easy to use and affordable for all agencies. With TSR-LAN users can add traffic stop information from multiple workstations at the same time.
